EDUCATION

Bachelor of Science in Computer Science

Georgia State University
Honors College

August 2023 - May 2027
Atlanta, Georgia

Relevant Coursework: Data Structures, System-Level Programming(CSC 3320), Principles of Computer Science II (CSC 1302)

SKILLS AND CERTIFICATES

Certifications: Codecademy Learn Python 3, CodePath Technical Interview Prep 2, CodePath Intro to Web Development, New Horizons CompTIA A+

Programming Languages: Python, HTML, CSS, C, Figma, Tkinter, Git

Soft Skills: Customer Service, Problem-Solving, Teamwork, Adaptability, Creativity, Attention to Detail

WORK EXPERIENCE

GSU EXLAB Makerspace | Student Assistant

May 2026 - Present

- Facilitate workshops in various maker technologies and skills, including 3D printing, sewing, fabrication, and laser cutting.
- Guide individuals to learning resources on the use of EXLAB equipment, tools, and machinery; manage equipment checkout and returns.
- Support individuals' self-learning by assisting them with their projects and answering their questions.

GSU Robinson College of Business | Student Technician

April 2024 – September 2024

- Provided technical support for faculty and students, troubleshooting hardware and software issues to ensure seamless classroom technology operation.
- Assisted in the setup, maintenance, and configuration of multimedia equipment for events and lectures, optimizing presentation quality and engagement.
- Collaborated with the IT team to streamline support processes, reducing response time for support requests by 15% and enhancing system efficiency.

New Horizons Computer Learning Centers | IT Intern

July 2022 – August 2022

- Facilitated and managed daily inquiries from prospective students, providing tailored program information and enhancing enrollment interest.
- Assisted in troubleshooting and resolving an average of 5 hardware and software issues weekly, improving system reliability and user satisfaction.
- Earned recognition from the employer for exceptional service and effective collaboration with staff.

PROJECTS

Life's Too Short | React Native, Firebase, HTML, CSS, JavaScript, TensorFlow

February 2025

- Engineered responsive Signup and Login pages using HTML, CSS, and JavaScript, while seamlessly integrating the Spotify API to enhance user interaction and engagement.
- Developed a cutting-edge mobile app during the UGAHacks X Hackathon leveraging React Native and Firebase for cross-platform support, with an AI-powered roasting engine utilizing TensorFlow.js and OpenAI GPT to analyze screen-time data and deliver personalized, humor-infused insights, encouraging users to reduce wasted time.

EXTRA-CURRICULAR ACTIVITIES

Organizations: RISE (Reaching for Inclusion Striving for Excellence) in Computing Star, Girls Who Code, Rewrite The Code (RTC)

Hackathons: UGAHacks X Hackathon 2025, GSU HackHERS Hackathon 2024, GSU Computer Science Demo Day 2025
